

Applicati n N .: 09/875,871

Applicants: Dwip N. Banerjee and Rabindranath Dutta

Filed: Jun 7, 2001

**Title: Using a C mmunications Network in Arranging Shipment of Goods
According to a Buyer's Preferences**

T.C./A.U.: 3644

Examiner: Stephen A. Holzen

Docket No.: AUS9-2001-0346-US1

RECEIVED

JAN 06 2004

GROUP 3600

Commissioner for Patents

PO Box 1450

Alexandria VA 22313-1450

DECLARATION UNDER 37 CFR 1.131

Sir:

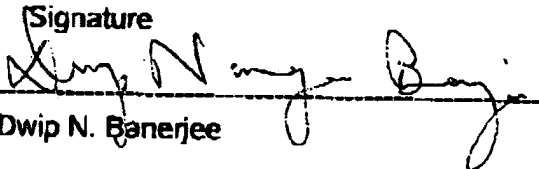

**We, Dwip N. Banerjee, Ph.D., and Rabindranath Dutta, Ph.D., hereby declare
that:**

- 1. We are the co-inventors of the above-mentioned patent application.**
- 2. Prior to October 31, 2000, we conceived the idea of using a
communications network in arranging shipment of goods according to a
buyer's preferences, as described and claimed in our patent application.
An invention disclosure (No. AUS8-2000-1441, copy attached hereto as
Exhibit A1) was created by Dr. Dutta, and provided to IBM on or about
October 31, 2000. This invention disclosure included diagrams of
embodiments of the invention, substantially as illustrated in FIG. 2 and
FIG. 4 of our patent application.**
- 3. IBM's invention disclosure team for this invention, of which Dr. Dutta was a
member, completed its evaluation of this invention on March 8, 2001. On
that date, the team decided to go ahead with a search for prior art, in
preparation for filing a patent application on this invention. IBM submitted
the request for the search on March 9, 2001, and received the results of
the search on April 4, 2001. On April 6, 2001, IBM decided to file a patent
application on this invention. These actions were documented on pages 5
and 6 of the archived invention disclosure (No. AUS8-2000-1441, copy
attached hereto as Exhibit A2).**

Application No.: 09/875,871
Declaration Under 37 CFR 1.131

4. Paul D. Heydon, Patent Attorney, acknowledged receipt of our invention disclosure in an email message (copy attached hereto as Exhibit B) addressed to both of us on April 16, 2001.
5. Dr. Banerjee met with Mr. Heydon at IBM's office complex in Austin, Texas on April 19, 2001, and discussed preparation of our patent application.
6. Dr. Banerjee communicated to Mr. Heydon comments about drafts of our patent application, in May, 2001, including an email message (copy attached hereto as Exhibit C) on May 16, 2001, and telephone conversations on May 7 and 17, 2001.
7. We both signed the Declaration and Power of Attorney for Patent Application, and the Assignment (copy attached hereto as Exhibit D), on May 31, 2001.
8. The acts described in this Declaration were carried out in the United States.

We hereby declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. 1001 and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Main Idea

*Title of disclosure (in English)

Business Method for Automatic Integration of Shipping and Handling into E-commerce in the B2B domain.

*Idea of disclosure

1. Describe your invention, stating the problem solved (if appropriate), and indicating the advantages of using the invention.

Submitted for the business method patent incentive

Reviewers should note that "patents on business methods are especially valuable in the marketplace today because they give companies exclusive rights to practice new ways of doing business" (from IBM announcement). Business methods spanning all industries are patentable subject matter and was reaffirmed recently by US. Court of Appeals for the Federal Circuit, in *State Street Bank & Trust Co. v. Signature Financial Group Inc.*, 149 F.3d 1368 (Fed. Cir. 1998). US Class 705/001 has hundreds of business method patents and submissions for business method patents have exploded industrywide. It is because of the scarcity of such business methods in the IBM portfolio that the special incentive award has been instituted. The 450 special awards to be provided in this scheme indicates the importance of business methods to IBM.

Note that the invention is exclusively for the B2B domain.

RELATED ART

Currently e-commerce transactions typically involve the cost for the physical shipment method being calculated by the seller's Web server in both Business to Business (B2B) and Business to Consumer domains. This is often a cause of customer complaint and annoyance because it makes price comparisons between products from different sellers extremely difficult since in e-commerce transactions shipment cost is often a significant part of the cost paid by the buyer. Price comparisons are often almost meaningless without the shipping charges. In particular with the explosion of B2B transactions shipping costs have become very important. The following picture shows a B2B marketplace for Verticalnet.

The following picture illustrates a situation where a searching service is utilized to find the prices of PalmPilot III, say on an B2B marketplace and the results sorted by price shows the magnitude of the problem. It can be seen that virtually none of the sites indicate their shipping costs. It is by offering a low price for the merchandise but increasing the shipping cost that e-commerce sellers often attract customers to visit their site. In fact some sites actually use robotic agents to quote the minimum price and make up for it via other costs or delays in product delivery. If a corporation wanted to order a thousand Palms for its employees and were searching for price it would cause immense problems.

The following Website contains an interesting article on how shippers are working with etailers to promote

customer convenience in product returns:

http://www.ec.ups.com/ecommerce/whatsnew/online_returns.html

UPS's example shows how important the shipper is for e-commerce. In fact, Fedex is even getting into the business of advising Fortune 500 corporations of efficient delivery of supplies and supply management.

Dell often ships monitors and computers from different plants but they are aggregated by the shipper and delivered to the business site together.

SUMMARY OF THE INVENTION

A method that completes an e-commerce transaction in two phases:

1. Buying an item at the advertised price from a merchant from one Web Server
2. Paying for shipment of the item via a buyer determined physical carrier of merchandise **in a B2B situation (while the method can be extended to B2C it might be cost prohibitive in that domain).**

The method integrates the two into an e-commerce system. In many corporations there are preferred shippers e.g. IBM has Airborne express for delivering small packages and letters. What we are suggesting is a preferred shipper for receiving.

PREFERRED EMBODIMENT

Figure 2 shows an overview of the system where the Web client of a business can connect over the Internet to the Seller's Web server and also to the preferred shipper's Web Server.

Figure 2: Overview of the system

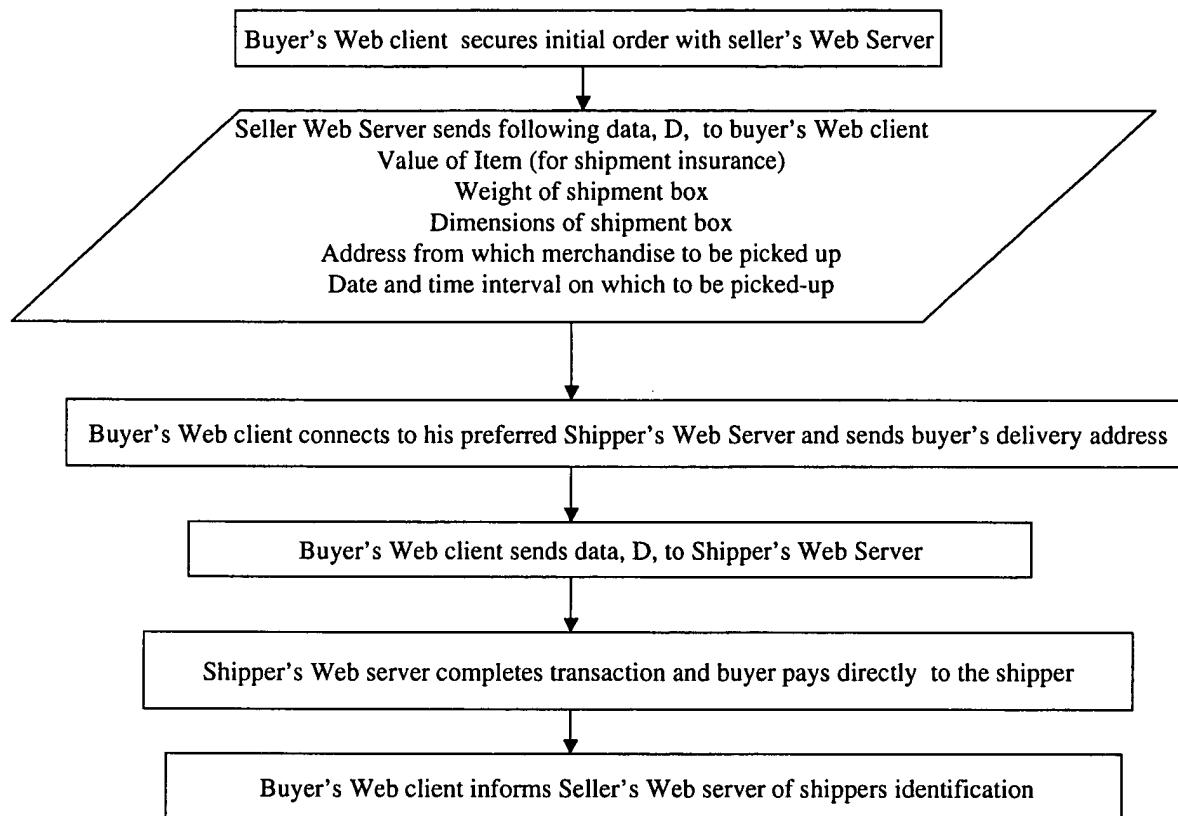

Figure 3 describes in a flowchart the sequence of transactions for an illustrative sale.

Figure 3: Flowchart of System

All kinds of variations to the embodiment like a seller leading the buyer to independent carriers from within his Web site should also be covered by the invention.

The scheme can be easily scaled to the business-to-business space where it can lend efficiency to enterprise resource management and supply chain management. Consider an example of a corporation like IBM that is buying a lot of materials from its suppliers like Xerox, Solectron etc. using UPS as interface for shipping and handling. When the procurement department or an individual department orders material they can enter their UPS code and the shipping and handling costs are automatically calculated (based on the existing rates between IBM and UPS in this case) and UPS charges IBM directly. At the same time UPS server is informed about the new procurement that needs to be shipped to IBM and it is given a tracking code (which UPS uses in its dealing with Xerox/Solectron for this particular IBM order).

It is clear that the enterprise resource management as well as the inventory is streamlined. It introduces automation and efficiency in the supply chain management for corporate entities as well.

CLAIMS

Method to enhance e-commerce transactions in a B2B situation comprising the following steps:

buying from a seller's Web Server;
paying for shipment costs to a shipper's Web Server; and
 shipping of items to destination through independent and direct interactions between buyer, seller and shipper using a tracking code that is shared between the three.

Dependent claim: Extension of the said method to business-to-business space involving corporations (procurers, suppliers and shippers) to promote automation and improve efficiency in enterprise resource planning and supply chain management.

Note that the invention is exclusively for the B2B domain as it is unlikely to be viable in the B2C domain - although we guess claims could encompass both.

2. How does the invention solve the problem or achieve an advantage,(a description of "the invention", including figures inline as appropriate)?

3. If the same advantage or problem has been identified by others (inside/outside IBM), how have those others solved it and does your solution differ and why is it better?

4. If the invention is implemented in a product or prototype, include technical details, purpose, disclosure details to others and the date of that implementation.

***Critical Questions (Questions 1 - 7 must be answered)**

<p>*Question 1 On what date was the invention workable? 10/13/2000 Please format the date as MM/DD/YYYY (Workable means i.e. when you know that your design will solve the problem)</p>

<p>*Question 2 Is there any planned or actual publication or disclosure of your invention to anyone outside IBM?</p>	<p><input type="radio"/> Yes <input checked="" type="radio"/> No</p>
<p>If yes, Enter the name of each publication or patent and the date published below. Publication/Patent: Date Published or Issued:</p>	
<p>Are you aware of any publications, products or patents that relate to this invention?</p>	<p><input type="radio"/> Yes <input checked="" type="radio"/> No</p>
<p>If yes, Enter the name of each publication or patent and the date published below. Publication/Patent: Date Published or Issued:</p>	

*Question 3	<input type="radio"/> Yes <input checked="" type="radio"/> No
Has the subject matter of the invention or a product incorporating the invention been sold, used internally in manufacturing, announced for sale, or included in a proposal?	
Is a sale, use in manufacturing, product announcement, or proposal planned?	
<input type="radio"/> Yes <input checked="" type="radio"/> No	
If Yes, identify the product if known and indicate the date or planned date of sale, announcements, or proposal and to whom the sale, announcement or proposal has been or will be made.	
Product: Version/Release: Code Name: Date: To Whom:	
If more than one, use cut and paste and append as necessary in the field provided.	

*Question 4	<input type="radio"/> Yes <input checked="" type="radio"/> No
Was the subject matter of your invention or a product incorporating your invention used in public, e.g., outside IBM or in the presence of non-IBMers?	
If yes, give a date. Please format the date as MM/DD/YYYY	

*Question 5	<input type="radio"/> Yes <input checked="" type="radio"/> No
Have you ever discussed your invention with others not employed at IBM?	
If yes, identify individuals and date discussed. Fill in the text area with the following information, the names of the individuals, the employer, date discussed, under CDA, and CDA #.	

*Question 6	<input type="radio"/> Yes <input checked="" type="radio"/> No <input type="radio"/> Not sure
Was the invention, in any way, started or developed under a government contract or project?	
If Yes, enter the contract number	

*Question 7	<input type="radio"/> Yes <input checked="" type="radio"/> No <input type="radio"/> Not Sure
Was the invention made in the course of any alliance, joint development or other contract activities?	
If Yes, enter the following :Name of Alliance, Contractor or Joint Developer	
Contract ID number	
Relationship contact name	
Relationship contact E-mail	
Relationship contact phone	

Question 8	<input checked="" type="radio"/> Yes <input type="radio"/> No
Have you submitted, or are you aware of, any related disclosure submission?	
If Yes, please provide the title and docket or disclosure number below:	
AUS8-1999-1011 which related to the B to C (business to consumer) domain was submitted by one of the inventors and closed without a patentability search being conducted as it was felt that this was difficult to implement for individual buyers. The current invention is for the B to B domain which is commercially very lucrative and has seen an explosion of growth in recent days.	

Question 9
What type of companies do you expect to compete with inventions of this type? <i>Check all that apply.</i>

<input type="checkbox"/>	Manufacturers of enterprise servers
<input type="checkbox"/>	Manufacturers of entry servers
<input type="checkbox"/>	Manufacturers of workstations
<input type="checkbox"/>	Manufacturers of PC's
<input type="checkbox"/>	Non-computer manufacturers
<input type="checkbox"/>	Developers of operating systems
<input type="checkbox"/>	Developers of networking software
<input type="checkbox"/>	Developers of application software
<input type="checkbox"/>	Integrated solution providers
<input type="checkbox"/>	Service providers
<input checked="" type="checkbox"/>	Other (Please specify below)
Large corporations with lots of shipping and commerce; UPS, Fedex, Postal service etc.	

Patent Value Tool (Optional - this may be used by the inventor and attorney to assist with the evaluation)

(The Patent Value tool can be used by you or the evaluation team to determine the potential licensing value of your invention.)

The **Patent Value Tool** has not yet been used to calculate a score.

***Critical Questions (Questions 1-9 must be answered in English)**

***Question 1**

On what date was the invention workable? 10/13/2000 Please format the date as MM/DD/YYYY
(Workable means i.e. when you know that your design will solve the problem)

***Question 2**

Is there any planned or actual publication or disclosure of your invention to anyone outside IBM? ☐ Yes ☒ No

If yes, Enter the name of each publication or patent and the date published below.

Publication/Patent:

Date Published or Issued:

Are you aware of any publications, products or patents that relate to this invention? ☐ Yes ☒ No

If yes, Enter the name of each publication or patent and the date published below.

Publication/Patent:

Date Published or Issued:

***Question 3**

Has the subject matter of the invention or a product incorporating the invention been sold, used internally in manufacturing, announced for sale, or included in a proposal? ☐ Yes ☒ No

Is a sale, use in manufacturing, product announcement, or proposal planned? ☐ Yes ☒ No

If Yes, identify the product if known and indicate the date or planned date of sale, announcements, or proposal and to whom the sale, announcement or proposal has been or will be made.

Product:

Version/Release:

Code Name:

Date:

To Whom:

If more than one, use cut and paste and append as necessary in the field provided.

***Question 4**

Was the subject matter of your invention or a product incorporating your invention used in public, e.g., outside IBM or in the presence of non-IBMers? ☐ Yes ☒ No

If yes, give a date. Please format the date as MM/DD/YYYY

***Question 5**

Have you ever discussed your invention with others not employed at IBM? ☐ Yes
No

If yes, identify individuals and date discussed. Fill in the text area with the following information, the names of the individuals, the employer, date discussed, under CDA, and CDA #.

***Question 6** ☐ Yes
Was the invention, in any way, started or developed under a government ☒ No
contract or project? ☐ Not sure

If Yes, enter the contract number

***Question 7** ☐ Yes
Was the invention made in the course of any alliance, joint development or ☒ No
other contract activities? ☐ Not Sure

If Yes, enter the following:

Name of Alliance, Contractor or Joint Developer

Contract ID number

Relationship contact name

Relationship contact E-mail

Relationship contact phone

***Question 8** ☒ Yes
Have you, or any of the other inventors, submitted this same invention ☐ No
disclosure or similar invention disclosure previously?

If Yes, please provide disclosure number below:

AUS8-1999-1011 which related to the B to C (business to consumer) domain was submitted by one of the inventors and closed without a patentability search being conducted as it was felt that this was difficult to implement for individual buyers. The current invention is for the B to B domain which is commercially very lucrative and has seen an explosion of growth in recent days.

***Question 9** ☐ Yes
Are you, or any of the other inventors, aware of any related inventions ☐ No
disclosures submitted by anyone in IBM previously?

If Yes, please provide the docket or disclosure number or any other identifying information below:

Question 10
What type of companies do you expect to compete with inventions of this type? Check all that apply.

- ☐ Manufacturers of enterprise servers
- ☐ Manufacturers of entry servers
- ☐ Manufacturers of workstations
- ☐ Manufacturers of PC's
- ☐ Non-computer manufacturers
- ☐ Developers of operating systems
- ☐ Developers of networking software
- ☐ Developers of application software
- ☐ Integrated solution providers
- ☐ Service providers
- ☒ Other (Please specify below)

Large corporations with lots of shipping and commerce; UPS, Fedex, Postal service etc.

Question 11.

If the invention relates to a product or service that is outside the scope of your business unit, please recommend IBM business unit(s), IBM location(s) or individual(s) within IBM that you think would provide a good evaluation of your invention:

***Patent Value Tool (Optional - this may be used by the inventor and attorney to assist with the eval**

(The Patent Value tool can be used by the inventor(s) to determine the potential licensing value of your invention.)

Market

***Question 1:** What is the anticipated annual market size (in dollars) that will be captured by your invention?

Reason(s) for above Answer:

Claims

***Question 1:** How new is the technical field?

Reason(s) for above Answer:

***Question 2:** How central is the invention to the product(s) which might be expected to contain the invention?

Reason(s) for above Answer:

***Question 3:** What is the scope of the claim?

Reason(s) for above Answer:

Portfolio Need

***Question 1:** What are the portfolio needs in the area of your invention?

Reason(s) for above Answer:

Exploitation & Enforcement

***Question 1:** How easily can the use of the invention by a competitor be detected?

Reason(s) for above Answer:

***Question 2:** How easily can the use of the invention be avoided by a competitor?

Reason(s) for above Answer:

Business Value

***Question 1:** What percentage of the companies producing products in the field of this invention might use this invention?

Reason(s) for above Answer:

***Question 2:** What is the value of this patent to current or anticipated Alliance Activity between IBM and other companies?

Reason(s) for above Answer:

***Question 3:** What is the value of this patent to current or anticipated Technology Transfer Activity between IBM and other companies?

Reason(s) for above Answer:

***Question 4:** Does it result in prestige to IBM?

Reason(s) for above Answer:

*Search type: ☒ Patentability ☐ Clearance ☐ Validity ☐ State of Art

*Features to be searched: In this invention, a buyer purchases something from an e-commerce web site, and then contracts separately for shipping services. Rather than selecting one of the seller's shipping methods and paying the seller, the buyer contracts with any shipper he chooses and pays the shipper directly.

Form Revised 09/01/02)

Subject: Re: E-commerce patent applications

Date: Mon, 16 Apr 2001 13:53:20 -0400

From: "Rabindranath Dutta" <dutta@us.ibm.com>

To: "Paul D. Heydon" <pheydon@stic.net>

CC: "Dwip N Banerjee" <dnbanerg@us.ibm.com>

Paul,

It was a pleasure working with you last month on the two patent applications. Dr. Dwip Banerjee my co-inventor will handle these applications with you and set up a meeting with you in Austin in the IBM Complex (the high rise buildings across the street from Leslie's office). Dwip is very accessible and prompt in returning messages and phone calls and is outstanding in explaining different aspects of the invention verbally to outside counsel. So you should have no difficulty with the inventions.

Dwip will contact you shortly to set up the time.

- Rabi

Subject: E-commerce patent applications

Leslie Van Leeuwen has retained me to write patent applications for two inventions:

Disclosure No. AUS8-2000-1441, Docket No. AUS9-2001-0346-US1

[Integration of shipping]

Disclosure No. AUS8-2000-1645, Docket No. AUS9-2001-0347-US1 [Bundled coupons]

I would be happy to meet with one or both of you in Austin to discuss these. We might also discuss some patents that Leslie found regarding shipping and e-commerce. Please let me know where you would prefer to meet, and some suggested times. [I would prefer not to meet early in the morning, or late in the afternoon, so that I can get in and out of Austin without encountering the worst of the traffic.] Thank you.

Best regards,

Paul D. Heydon

EXHIBIT B

Subject: Re: Patent applications

Date: Wed, 16 May 2001 16:31:55 -0500 (CDT)

From: dwip@austin.ibm.com

To: pheymon@stic.net (Paul D. Heydon)

Paul,

I just retrieved your faxed writeup. we had some stuff going on today (i just came to work), so I'll take a look overnight and have my comments ready for you tomorrow. I'll call you or email you with the comments. And the XML bit sounds fine. Feel free to put it in. thanks,

Dwip

EXHIBIT C

ASSIGNMENT

Whereas, we,

(1) Dwip N. Banerjee of 3607 Greystone Drive, #823, Austin,
County of Travis and State of Texas

and

(2) Rabindranath Dutta of 3401 Parmer Lane West, #835, Austin,
County of Travis and State of Texas

have invented Using a Communications Network in Arranging Shipment of Goods According to a Buyer's Preferences

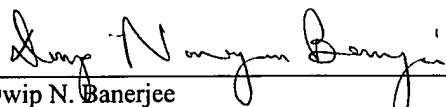

and executed a United States patent application therefore on

(Date Inventor Signed Declaration)(1) 05/31, 2001; and (2) 05/31, 2001.

Whereas, INTERNATIONAL BUSINESS MACHINES CORPORATION, a corporation of New York, having a place of business in Armonk, New York 10504, (hereinafter called IBM), desires to acquire the entire right, title and interest in the said application and invention, and to any United States and foreign patents to be obtained therefore;

Now therefore, for a valuable consideration, receipt whereof is hereby acknowledged, I, the above named, hereby sell, assign, and transfer to IBM, its successors and assigns, the entire right, title and interest in the said application and invention therein disclosed for the United States and foreign countries, and all rights of priority resulting from the filing of the said United States application, and I request the Commissioner of Patents to issue any Letters Patent granted upon the invention set forth in said application to IBM, its successors and assigns; and I hereby agree that IBM may apply for foreign Letters Patent on said invention and I will execute all papers necessary in connection with the United States and foreign applications when called upon to do so by IBM.

Signed at AUSTIN on 05/31, 2001.

Dwip N. Banerjee

Signed at AUSTIN on 05/31, 2001.
